A TRUE PIECE OF NATURE.

CRAFTED PARQUET FLOORING FROM ROTT AM INN

Here at HAIN, we believe in combining modern technology, our many years of experience and high-quality design. The technology creates the conditions – our know-how brings the quality. In our factory in the Bavarian town of Rott am Inn, modern production facilities meet experienced and trained employees. The result: high-quality crafted parquet flooring that brings a touch of nature into your home.

Our self-developed, gentle process brings the best out of the naturally grown wood in our planks and parquet variants. Our pioneering role can be seen,

for example, in our special surface structures and our many oxygen-hardened oiled surfaces. However, our natural wood drying process, which gives the planks the time they need to mature, also speaks for the innovative strength of our traditional company. As a company that acts responsibly and has deep roots in our region, we feel equally committed to our customers, our employees and our environment. This is why the raw material wood that we process comes exclusively from sustainably cultivated forests. This way, we produce tough and exclusive crafted natural floors with lasting quality.

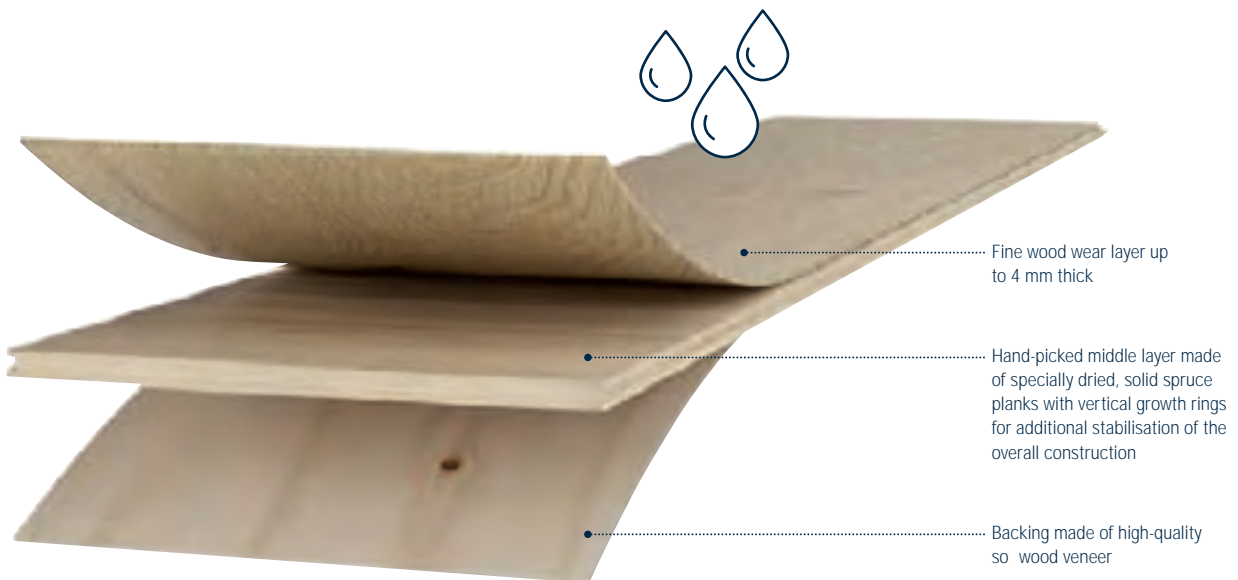

PRIMUS/Brown Vario larch /133 Light white oiled /brushed

OUR PRODUCT: HIGH-QUALITY PARQUET FLOORING

PRODUCT ADVANTAGES

The high-quality, triple-layered construction with vertical growth rings guarantees the high dimensional stability and durability of the planks. The wear layer, which is up to 4 mm thick, is connected to the spruce substructure using a special press. Different installation heights are available (12 mm, 15 mm and 17 mm) – planks with a thickness of 12 mm are firmly bonded and are ideal for renovations and commercial areas. Thanks to the stable tongue and groove connection, planks with a thickness of 15 mm or more can either be bonded permanently in place or laid in a floating installation, if necessary. The surface can be sanded down multiple times.

Exception: Smoked oak

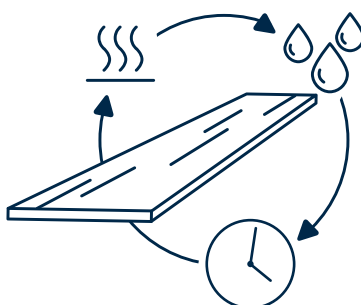

Exception: Castello and smoked oak

Made in Germany

Warranty according to HAIN warranty conditions

SPECIAL OILED SURFACE

The natural oil finish perfects every single plank and gives HAIN flooring its distinctive character. Before oiling, the wood is gently heated, opening up the pores so that the oil is more effectively absorbed. HAIN's natural oil (free from coatings or waxy substances) is

applied lightly and evenly to the wood. The planks are then placed in special drying racks and given plenty of time for the oil to absorb and air dry. Meanwhile, the wood retains its natural beauty and breathability.

CRAFTSMANSHIP MEETS MODERNITY

Oiled natural flooring has an irresistible quality: They become more elegant and beautiful from year to year – a big plus for sustainability! But it's not only the look that counts: The technical features of HAIN natural flooring are also compelling.

NATURALLY DRIED WOOD

A special process of natural wood drying brings out the qualities of the wood to their best advantage.

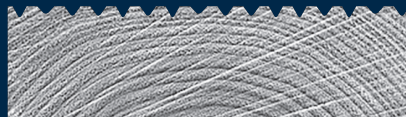

DURABLE

Thanks to our complex and gentle finishing processes, the floors are long-lasting and durable – in almost all areas of application.

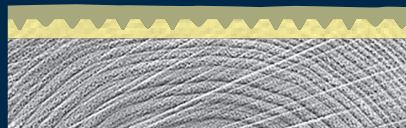

HIGH QUALITY NATURAL OIL

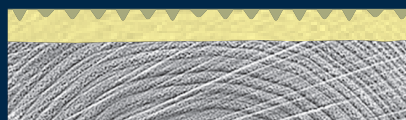

Each HAIN plank is oiled and oxidatively dried several times – this makes the floor particularly stable and accentuates the natural look of the wood.

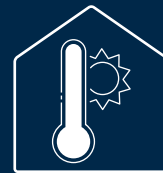

Wood surface "Raw"

Film-forming surface "Paints/Waxes"

HAIN natural surface "Oiled"

PROVIDES HEALTHY AIR IN YOUR HOME

The naturally finished wood automatically compensates for fluctuations in temperature and humidity, thus having a positive effect on the room climate.

EASY TO MAINTAIN

Care soap and special balm specially adapted to the floor ensure easy maintenance.

A TRUE PIECE OF NATURE. INDIVIDUALLY MANUFACTURED.

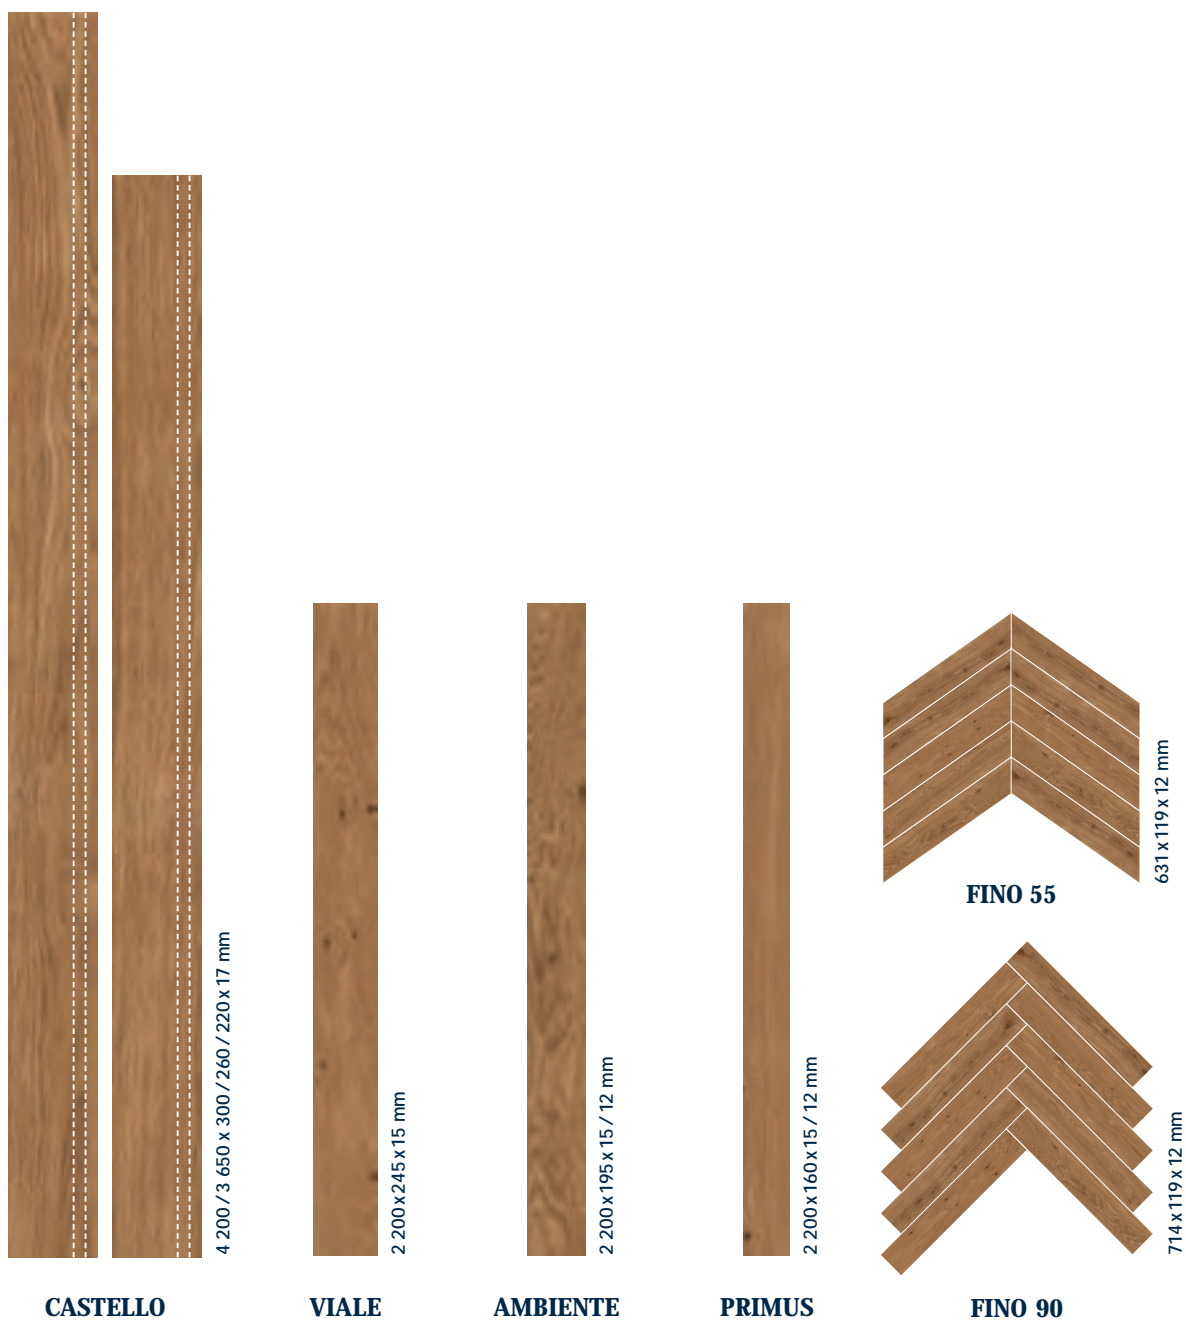

Here at HAIN, we pay attention to every last detail. As parquet flooring craft experts steeped in tradition, we have decades of experience in the realisation of sophisticated real estate projects in the private and commercial sector. In doing so, we quickly discovered: Standard solutions are not enough to satisfy the individual requirements of our customers.

That's why we go the extra mile and offer a systematic range of customisation options: our product range is based on six parquet collections that, in addition to classic planks, also feature large-format château planks and elegant herringbone parquet. Depending on the wood type, you have a choice of up to 16 colours, 6 gradings, 6 structures and 6 bevel types. Oak wood continues to play the leading role at HAIN, while larch, ash, walnut and Swiss pine provide attractive alternatives. In our product range overview, you will find combination options for the various product features at a glance – for any other variants, please feel free to contact us.

Regardless of which floor you choose, you can be sure of getting a unique and high-quality parquet floor for your home. Simply a true piece of nature.

WOODS

Oak

Brinell hardness: 34 N/mm²

Most popular parquet wood
Low swelling and shrinking behaviour
High indentation resistance
Wide variety of colours available

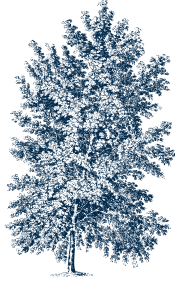

Larch

Brinell hardness: 19 N/mm²

Slightly softer than softwood
Creates a pleasant atmosphere
Exceptional grain
Distinctive variety of hues

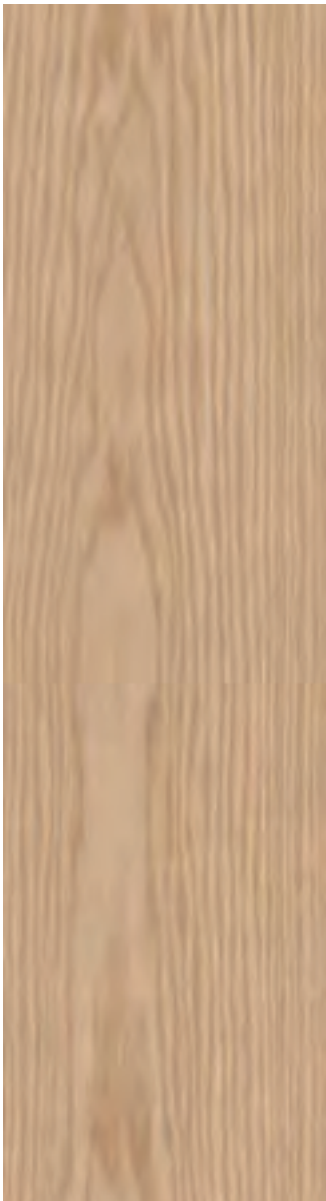

Ash

Brinell hardness: 38 N/mm²

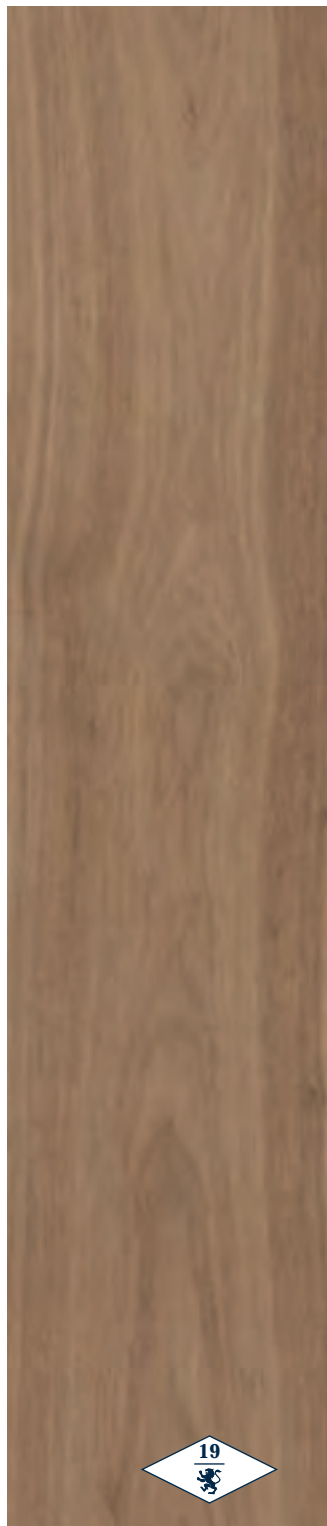

- Exclusively in Europe
- Conventional hardwood
- Low swelling and shrinking behaviour
- High indentation resistance
- Lighter colouring

Walnut

Brinell hardness: 26 N/mm²

- American fine wood
- Natural dark colouring
- Exceptional grain

Swiss pine

Brinell hardness: 15 N/mm²

- Local wood from the High Alps
- Light, pleasant-feeling soft wood
- Characteristic aromatic scent
- Distinctive variety of hues

GRADINGS

Just like every HAIN plank, every tree is one of a kind. No two trees are exactly alike, and even within the same tree, the wood can vary drastically. This natural quality of wood is also reflected in HAIN natural flooring. Our parquet flooring can be calm and uniform in appearance, or extremely rustic and expressive. The particular character of the wood is known as the grading. At HAIN, we offer six different gradings.

PERFECT

- ◆ Calm appearance
- ◆ Mild variations in colour and structure
- ◆ Only a few small, intergrown knots
- ◆ Wood filling possible for levelling of knots
- ◆ Ingrowths and sapwood are possible in walnut wood

CLASSIC

- ◆ Lively appearance
- ◆ Moderate variations in colour and structure
- ◆ Larger amount of intergrown knots up to 40 mm in size
- ◆ Filled knots up to a diameter of 40 mm are possible
- ◆ Ingrowths and sapwood are possible in walnut wood

BROWN VARIO / BLACK VARIO*

- ◆ Very lively appearance
- ◆ Marked variations in colour and structure
- ◆ Featuring large knots, heartwood and strong colour variations
- ◆ Larger filling of knots and cracks
- ◆ With larch wood, marked colour variations between individual planks

BROWN LAVA / BLACK LAVA*

- ◆ Very rustic appearance
- ◆ Marked variations in colour and structure
- ◆ Featuring large knots, open cracks, heartwood and strong colour variations
- ◆ Larger filling of knots and cracks

*describes the respective filler colour

STRUCTURES

Another way of varying the appearance of wood is with different surface structures. As craft experts with decades of experience, we apply our whole body of knowledge to refine our wood material with detailed surface finishes.

SANDED SMOOTH

Sanded smooth planks have a very uniform, harmonious surface.

BRUSHED

When brushing the planks, the softer elements of the wood are removed, bringing the natural grain to the fore.

ROUGH GRAIN

The planks are planed along the grain. The resulting structure is intentionally irregular.

PLANED

Like the rough-grain structure, this too is planed. However, its appearance is very regular.

USED

The used structure imitates the appearance of old wood – evenly worn over many years and with a distinctive vintage character.

SAW-CUT

To create this structure, heavy cuts are made in the surface with a saw. This creates an intentionally raw and rustic look.

BEVEL VARIANTS

OO

SHARP-EDGED

Sharp-edged means there is no bevel. The planks fit together “seamlessly”, creating an extremely homogeneous surface.

MM

ALL-ROUND MICRO-BEVEL

An all-round micro-bevel subtly outlines every single plank.

XX

ALL-ROUND SHARP BEVEL

Unlike the all-round micro-bevel, the all-round sharp bevel starkly outlines every single plank.

MO

MICRO-BEVEL ON THE LONG SIDE

A small micro-bevel on the long side gives the planks an endless appearance.

XO

SHARP BEVEL ON THE LONG SIDE

A sharp bevel on the long side accentuates the endless appearance even more.

XL

SHARP BEVEL ON THE LONG SIDE / SLIGHT BEVEL AT THE END

A sharp bevel on the long side combined with a slight bevel at the end accentuates the length of the planks, while setting a clear boundary between them.

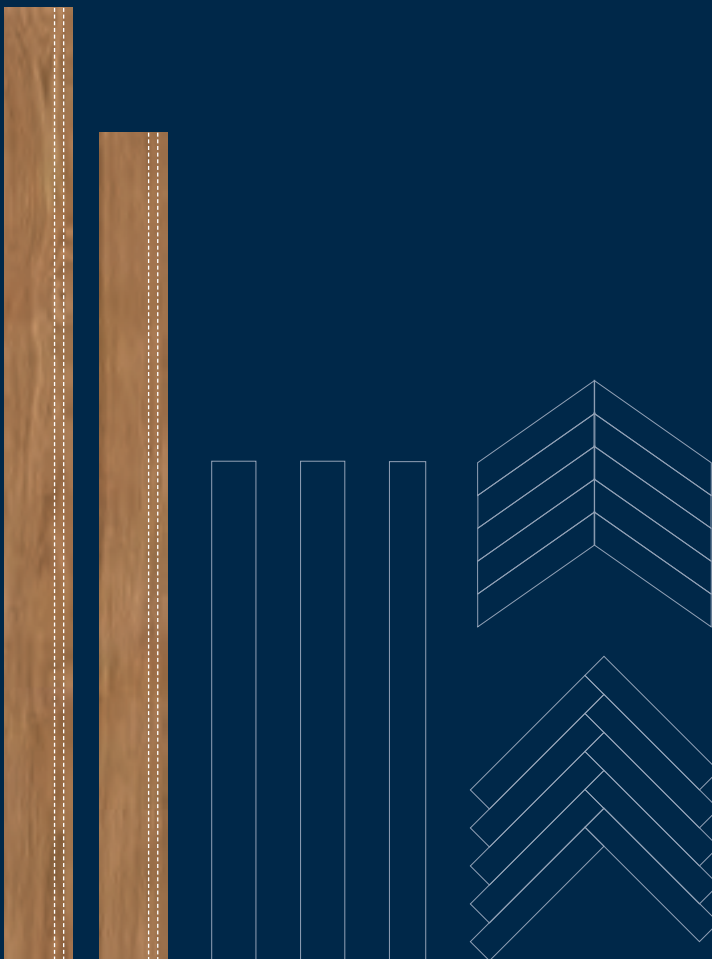

AMBIENTE / Brown Lava oak / 301 Greige oiled / used

CASTELLO

Just as the name implies: CASTELLO encompasses all the château plank formats in the HAIN product range. With their impressive 4 200 and 3 650 mm lengths, CASTELLO planks show true greatness and bring out the natural quality of wood in a particu-

larly authentic and expressive way – with the special HAIN oiled surface, like all HAIN floors. The three different widths ensure a balanced and yet exciting installation design.

Two lengths mixed: 4 200 mm, 3 650 mm

Three widths mixed: 300 mm, 260 mm, 220 mm

Thickness: 17 mm

Woods: Oak, larch

CASTELLO / Classic oak / 042 Smoked oak oiled / sanded smooth

CASTELLO / Black Vario oak / 040 Colourless oiled / brushed

VIALE

With a length of 2 200 mm, our VIALE floors are the alternative to the CASTELLO château planks. The special width (245 mm) makes VIALE the

perfect choice for all those who want an exceptional flooring with that certain something.

Length: 2 200 mm

Width: 245 mm

Thickness: 15 mm

Woods: Oak, larch

VIALE / Brown Lava oak / 040 Colourless oiled / brushed

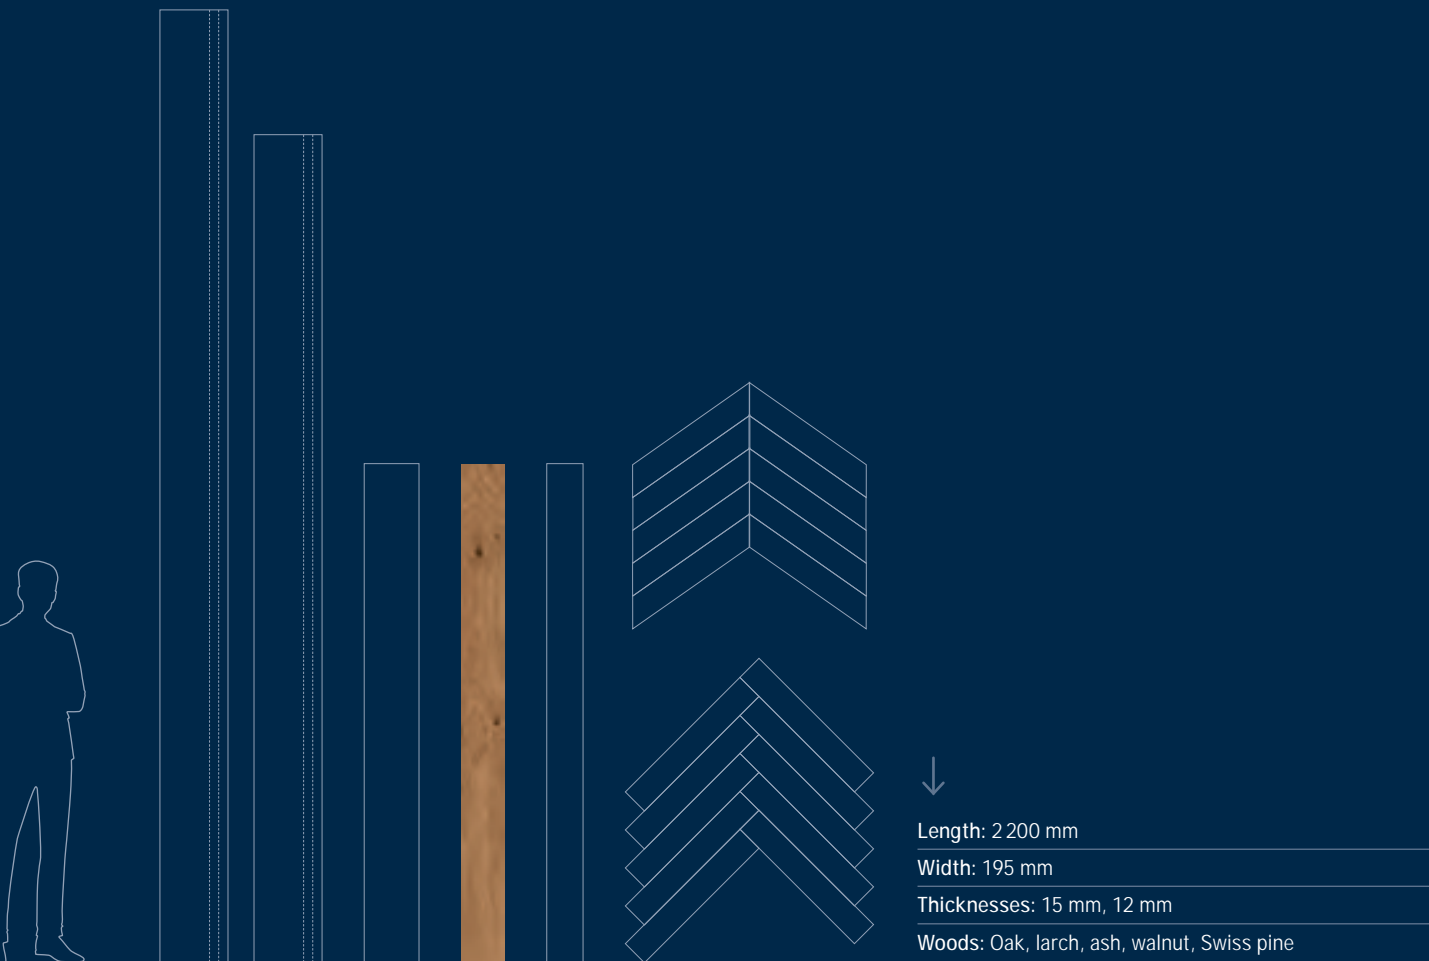

VIALE/Perfect oak / 133 Light white oiled / brushed

AMBIENTE

The classic planks are the evergreen of floor design, and with their format of 2 200 x 195 mm they're both impressive and easy to handle. AMBIENTE planks also feature an elegant HAIN

oiled surface, which is applied several times and allowed to air dry in ample peace and quiet – true craftsmanship!

AMBIENTE / Black Lava oak / 040 Colourless oiled / brushed

AMBIENTE / Black Vario oak / 501 Steamed colourless oiled / brushed

AMBIENTE / Brown Lava oak / 301 Greige oiled / used

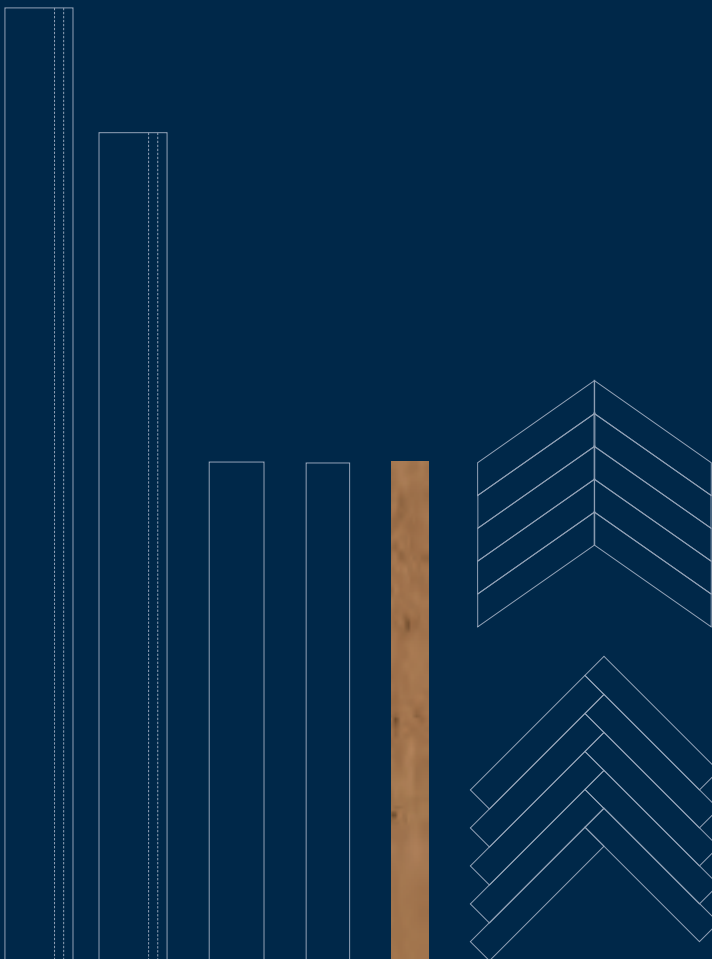

AMBIENTE / Perfect oak / 490 Raw look oiled / brushed

PRIMUS

A classic plank – the narrowest in the HAIN product range, with a width of 160 mm. However, when it comes to woods, gradings and structures,

it offers just as much variety as its AMBIENTE and VIALE counterparts.

Length: 2200 mm

Width: 160 mm

Thicknesses: 15 mm, 12 mm

Woods: Oak, larch, ash, walnut, Swiss pine

PRIMUS / Perfect oak / 134 Extra-white oiled / brushed

PRIMUS/Classic oak/040 Colourless oiled/rough grain

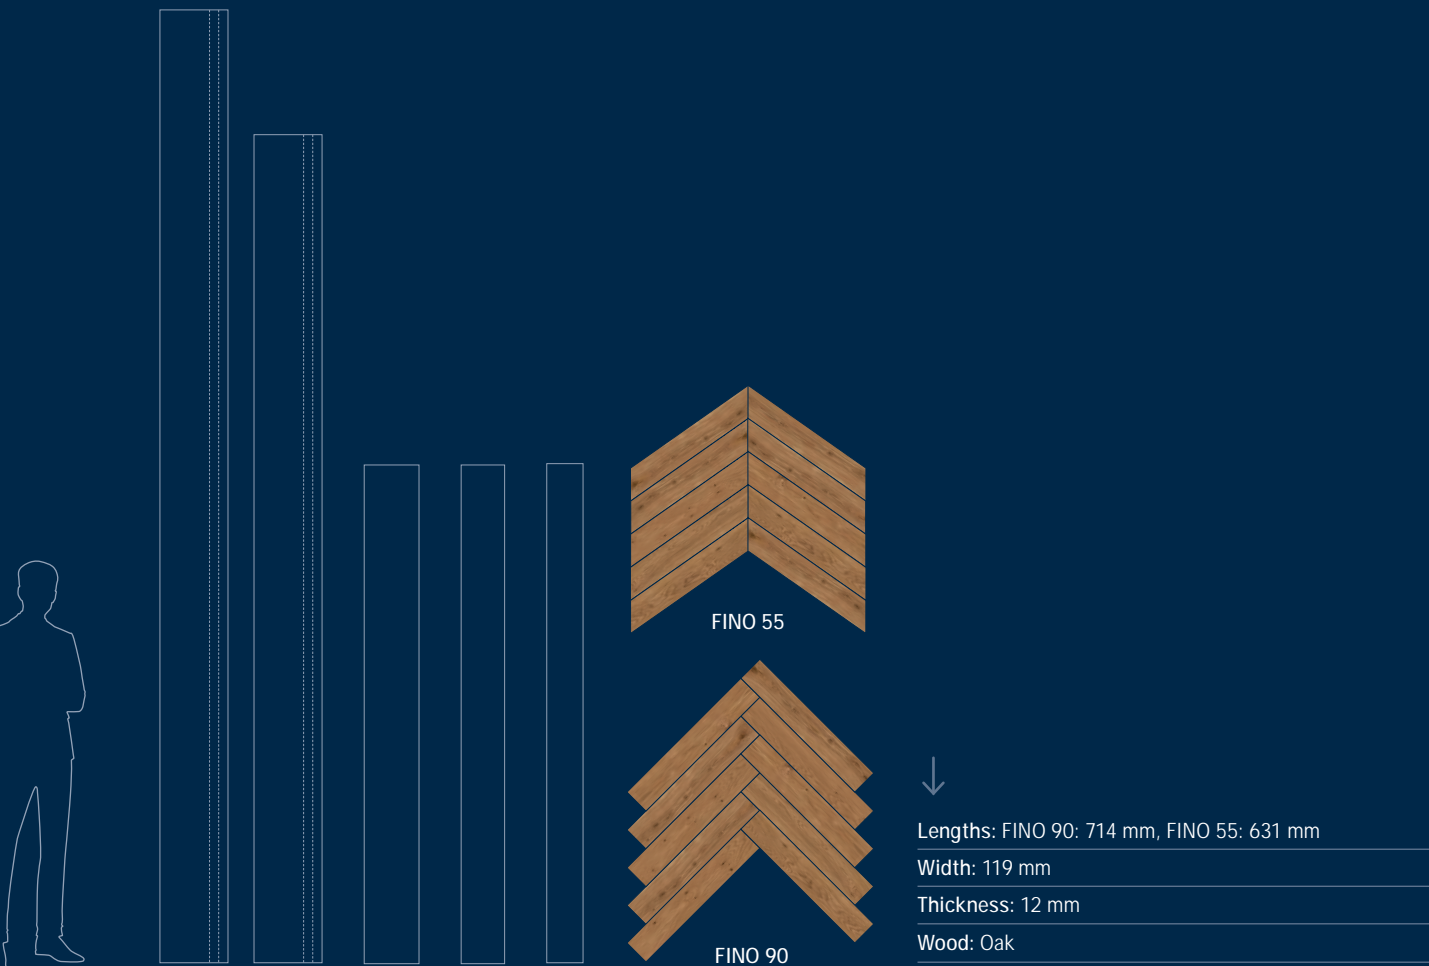

PRIMUS / Classic ash / 133 Light white oiled / brushed

FINO

Herringbone is a classic laying pattern with a long history – and remains a popular trend. It's not hard to see why, as it strikes the perfect balance between elegant and modern. With herringbone parquet, you bring a varied flooring into your home. Choose between classic herringbone (FINO 90)

and French herringbone (FINO 55). With the French herringbone FINO 55, the individual parquet planks are bevelled by 55°, thus forming a straight line when laid. This creates a slightly different look than the rectangular FINO 90 planks, which are laid in an interlocked pattern.

FINO 90 / Perfect oak / 040 Colourless oiled / brushed

FINO 90 / Perfect oak / 042 Smoked oak oiled / brushed

ACCESSORIES FOR YOUR HAIN NATURAL FLOORING: INDIVIDUAL AND PRECISELY FITTING

Individual natural flooring requires individual accessories! That's why you will find matching mouldings, stair profiles, and cleaning and maintenance products that are 100% compatible with the high-quality oiled surface for every floor in the HAIN product range. This way, we help you ensure that your new HAIN floor will last for many years and retain not only its quality, but its beautiful natural look. For a HAIN natural floor is a decision for life!

CLEANING AND CARE

SPECIAL SOAP

For day-to-day cleaning and care of oiled wood surfaces indoors

FLOOR CARE BALM

Ideal care product for refreshment of oiled wood surfaces indoors

FLOOR CARE SET

consisting of special soap, floor care balm, cloth, cleaning pad, sponge, shoe covers, spray bottle, natural oil solvent for cleaning of tools

EVERYTHING FROM A SINGLE SOURCE: HAIN STAIRCASES

Would you like stairs to match your parquet flooring? No problem with HAIN! We make individual steps in the same material as your HAIN natural flooring – for an elegant and harmonious overall look! We offer L and U-shaped profiles.

MEASURE STAIRCASES USING THE STAIRBOX® STAIR SYSTEM

- ◆ Time-saving
- ◆ Cost-saving
- ◆ Precise

What is stairbox®?

Stairbox® is an innovative electronic measurement system for staircase construction. With this system, even complex staircase measurements can be completed quickly and easily on site with maximum precision. During the measurement process, the measured steps are visualised in real time on the supplied computer software and saved as a digital template. This guarantees the utmost precision!

Our service for you:

- ◆ Precision measurement in just a few minutes
- ◆ Data transfer to the staircase software
- ◆ Clarification of all important details with the retailer and end customer
- ◆ Flat rate: €750, invoiced with order placement
